RE: MedSolutions Radiology Management Program

Dear Delaware Physicians Care Provider:

Delaware Physicians Care, an Aetna Medicaid Plan, continues to implement quality initiatives to support your patient care efforts and improve our service.

In line with this goal, and after careful consideration, we have chosen MedSolutions to provide utilization management for outpatient diagnostic radiology services for Delaware Physicians Care members. MedSolutions is a radiology services organization that specializes in managing diagnostic services. The new radiology requirements will become effective on or after March 1, 2011.

For all outpatient elective CT, MR, and PET imaging studies performed on or after the effective date (to be announced) the referring provider will be required to notify MedSolutions by submission of their request via secure internet web portal (preferred), toll-free telephone or toll-free fax. Any authorization made by Delaware Physicians Care ten days or more prior to the effective date for a date of service on or after the effective date *will* be honored.

Imaging studies performed in conjunction with an inpatient stay or emergency room visit are not subject to prior notification requirements.

Over the next several weeks, more information will be provided concerning the details of the program. Please note that implementation of this program allows us to assist our providers and members to obtain the most appropriate imaging study and ensure that the study is performed by a participating network imaging provider.

Thank you for the high-quality health care you provide to our members. If you have any questions, please contact your Provider Relations Representative at 1-800-287-9860.

Sincerely,

Stanley S. Lynch, MD  
Chief Medical Officer  
Delaware Physicians Care
